Research for New HIV Prevention Technologies: Community Perspectives

XIX INTERNATIONAL AIDS
CONFERENCE JULY 22 - 27
WASHINGTON DC USA

TURNING THE TIDE TOGETHER

A Satellite Session at:

Monday, July 23rd

7:00-8:30am

Mini Room 8

Developing effective prevention tools requires community involvement in every stage of designing, testing and ensuring access to tools. The session will examine how community engagement can inform microbicide, PrEP and vaccine research, help ensure future access for diverse populations, and help shape comprehensive combination prevention programs.

Please join us for an exciting discussion moderated by Kevin Moody of GNP+. Panelists to be announced shortly.

A light breakfast and beverages will be provided.
